

EU DECLARATION OF CONFORMITY (Per Annex IV of MDR (EU) 2017/745) (EN)	
Name and address of the firm	MEDIGMA BIOMEDICAL GmbH Siemensstraße 10, 78564 Wehingen, Germany
Single Registration Number - SRN	DE-MF-000009412
We declare under our sole responsibility that Meets all the provisions of REGULATION MDR (EU) 2017/745 which apply to it	
Basic UDI-DI	The full list of Basic UDI-DI covered by this Declaration of Conformity is referenced in the list below.
UDI-DI	The list of products including UDI-DI covered by this Declaration of Conformity is referenced in the list below.
The medical device (EN)	Dental Tools and Accessories
of class	Class I according to annex VIII Rule 5 of MDR (EU) 2017/745
Intended use	• Medigma's dental analogs and plastic abutments are intended to be used in a patient master model to duplicate implant or abutment position during laboratory prosthetics fabrication. • Medigma's Dental hand instruments contain a variety of instruments used during the surgical operation of implant placement and for prosthetic

	operations. Dental hand instruments provided to support the complete clinical procedures, as follows: guide the drilling process, fixate surgical templates, remove intact abutments, indicating of implant position, aid in surgical procedure such as implant placement and screw tightening. With or without torque indication. • Medigma's Impression Trays are intended to indicate the position of an implant relatively to the natural teeth and jaw structure. In order to position the implant analog in the operative working model. Transfers are commonly categorized by one of two types: Open Tray, Closed Tray. • Medigma's Dental Hand Instruments, surgical contain a variety of instruments used during the surgical operation of implant placement and for prosthetic operations. Dental Hand Instruments (surgical) provided to support the complete clinical procedures, as follows: - used in conjunction with a drilling unit to aid in surgical procedure such as implant placement and screw tightening. With or without torque indication. - limit the drilling depth according to the user needs. - evaluating the drilling depth. - verifying parallelism between neighbor osteotome locations during the initial stages of the drilling process. - aid in surgical procedure such as implant placement and screw tightening.
Applied harmonized standards, national standards or other normative documents (EN)	The list of applied standards provided in Appendix A.

Conformity assessment procedure	MDR (EU) 2017/745, Article 52, Annex IX (Chapters I), and applicable GSPRs.
